The beading tools are indispensable for gem-setters, who are using them for giving a well-shaped bead when setting gemstones on a jewel. *Vallorbe* has developed this tools per excellence for You. It is a complement to our *Glardon* gravers.

With its extensive experience and technological know-how in the jewellery tooling, *Vallorbe* is bringing on the market a remarkable beading tool, Swiss Made and manufactured in our production site.

The *Glardon* beading tool is made of high quality chromium steel. This special alloy, which is already used for the production of the *Vallorbe* files, is offering a unique hardness to our beading tools (tolerances 64-66 HRc) and a superior wear resistance.

- Shank : 2.6 mm
- Total length : 60 mm
- Box of 100 pieces
