IT

Emeritalia manufactures vacuum cleaners for dental technician benches and goldsmith's laboratories, compatible with any type of equipment used and integrable to the workstation in over-counter or under-counter mode. The high power combined with the low noise level of Emeritalia's vacuum cleaners ensure greater work efficiency and the highest standards of cleanliness and safety, thanks to the punctual suction and multilayer filtering of dust generated during processing.

Practicality of use: LABÒ vacuum cleaners are extremely immediate to connect (by Plug&Play connection), operate, clean and maintain. They are equipped with EMC control, which automatically manages start/stop phases and as well suction power.

Powerful, quiet, clean: LABÒ vacuum cleaners are extremely powerful while being surprisingly quiet at the same time. Absolute cleanliness is ensured by a multi-level filtration system.

Large quantities of milling and fine powders put quickly your CAM unit in critical condition: they must be removed quickly and effectively.

LABÒ CAM vacuums remove dust from milling machine and the highly effective filtering system reliably picks it up.

Connecting the vacuum to the CAM unit. The interface connection ensures that the CAM unit and the vacuum device communicate perfectly to automatically manage start and stop. For the toughest jobs, the LABÒ CAM is also available with brushless motor.
